The American Naturalization Question.

London, Jan 8, 1858.

Nearly all the great journals of this city have editeution recently adopted by the House of Representatives ed States on the question of citizenship. of the American view, as expressed in President John-States, are urged with singular unanimity.

President Johnson, in his Message to Congress, deliv-

al argument on the subject of the natu-

ralisation of foreigners by the United States thus:—
The substation of many small German States to Prussia and the reorganization of that country under a new and liberal constitution have induced me to renew the effort to obtain a just and prompt settlement of the long vexed question concerning the claims of foreign States for military service from their subjects naturalized in the United States. In connection with this subject the attention of Congress is respectfully called to a singular and embarrassing conflict of Laws. The Executive Department of this government has hitherto uniformity with the constitution and laws of the United States absolves the recipiest from his native allegance. The courts of Great Britain hold that allegance to the British crown is indefeasible, and is not absolved by our maturalization. Tritish Judges cite courts and law authorities of the United States in support of that theory ritios of the United States in support of that theory the United States. This conflict perplexes the public mind concerning the rights of naturalized citizens and impairs the national authority abroad. I called streaming to this subject in my last annual message, and now again respectfully appear to Congress to declare the national will immediately upon this important question.

The Dendlock in the Legislature-No Organi-Ention in the House. Hannissons, Jan. 8, 1868.

The Democratic State Central Committee has deemed the stot to take no action in the matter and to make no recommendation to its party members. Meantime the democrats have some hopes that affairs will so change as to give them the Speaker. Such a result is actually possible, but not probable.
